

# Follow the directions given below for correct use of TileFixo:

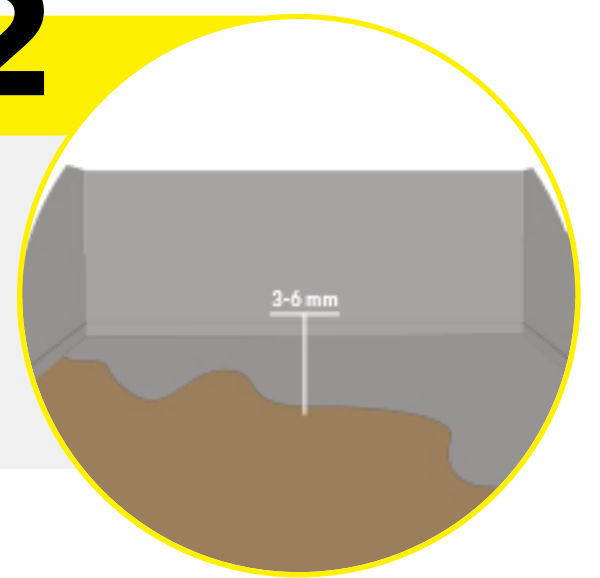

## 01

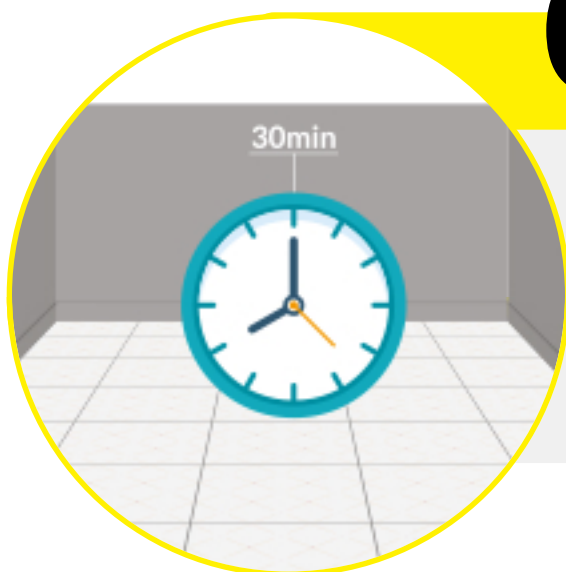

Mix the clean potable water and TileFixo in a clean container in the ratio 1:4.

## 02

Lay 3 - 6 mm thick layer of the mixture on the surface and fix the tiles properly on it.

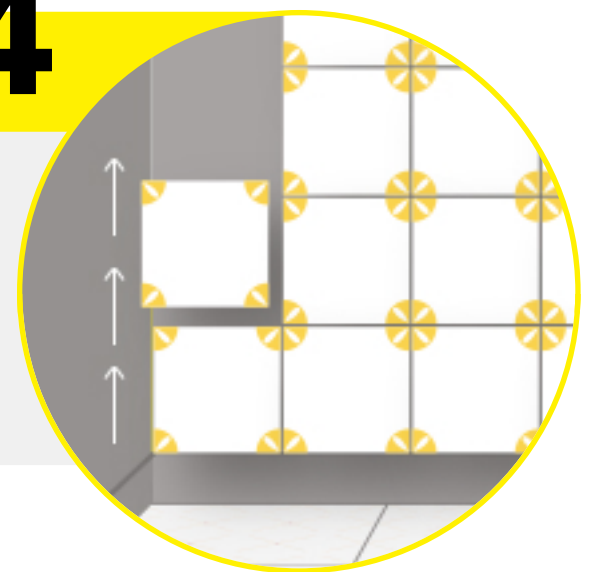

## 03

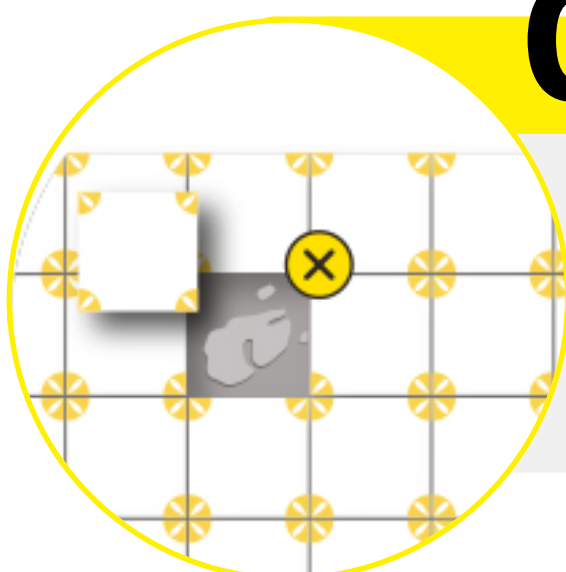

For correct bonding, the floor tiles should be fixed on it within 30 minutes of laying the mixture.

## 04

While fixing the wall tiles, fix them from down to upwards.

## 05

Take note that, there should be no gap between the wall tile and the wall.
