Track record of successfully integrating large acquisitions

Company	Jaypee Cement	Binani Cement	Century Cement
Date	June 2017	November 2018	October 2019
Capacity (mtpa)	21.2	6.25	14.6
Rationale	■ Enter new markets (Central India, Coastal AP and HP) with limited UltraTech presence ■ Unique opportunity to acquire over 20 MTPA of capacity in one go ■ Securing large limestone reserves ■ Acquisition EV lower than expected replacement cost	■ Enabled company to access to large reserves of high-quality limestone ■ Consolidated the company's leadership in the fast-growing Northern and Western markets in India	■ Strengthened position in the Eastern markets and provided deeper penetration in Central & Western markets ■ Added ~6,500 dealers, increasing the network size to ~29,000
Turnaround	■ Capacity utilization improved to about 70%+ in line with UTCL existing plants in similar market ■ Brand transition completed within 52 days of acquisition for all the plants ■ Achieved about 25% variable cost reduction over pre-acquisition level ■ EBITDA per ton improved from negative level to INR 1,000/t+	■ Capacity utilization increased to 75% vs ~45% (pre-acquisition) ■ Brand transition completed in 21 days ■ Achieved one of the lowest variable cost of production amongst other UltraTech plants in North region ■ FY20 operating EBITDA > INR 1250/t ■ Completed disposal of one of the overseas non-core asset	■ Capacity utilization increased over 80% within 6 months of acquisition ■ Completed brand transition for 72% volume ■ Cost improvement program underway ■ Achieved EBITDA per ton of INR 700/t in Q2 FY21 ■ Complete Integration by March 2021
