

**Build a
long lasting
reputation,
overnight!**

UltraTech
RAPID

UltraTech
RAPID

In a city always on the move, nobody can afford to be slow & steady on repairs.

Repairs done with regular concrete require minimum 2 weeks to gain workable strength, which we are rarely provided with, given the urgency. This adversely impacts the quality of our work leading to more and frequent repairs.

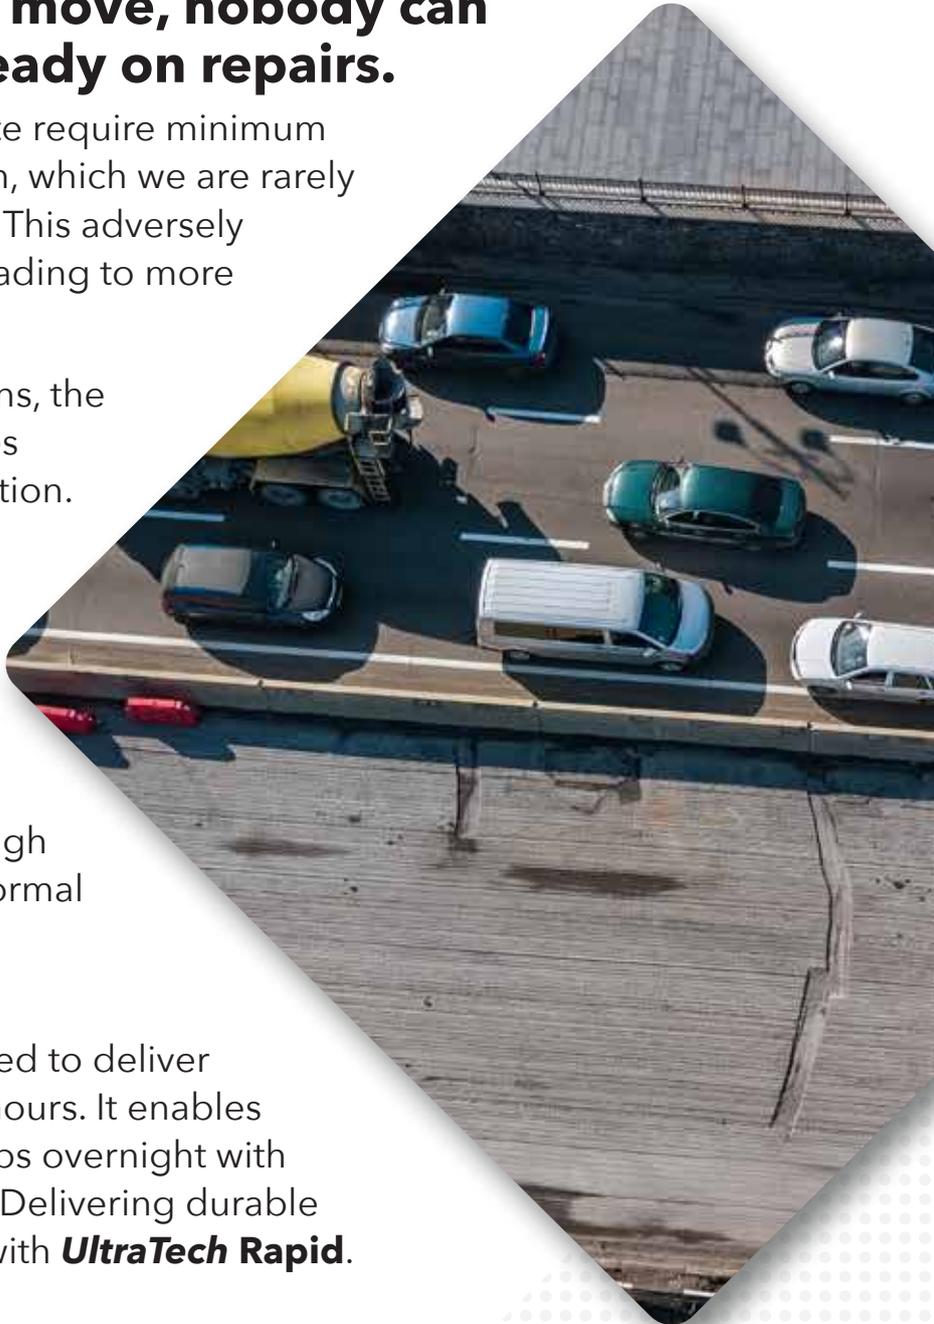

Despite our best effort & intentions, the disruption & inconvenience causes irreparable damage to our reputation.

Introducing **UltraTech RAPID**

An amazing concrete that gains high early strength without affecting normal placement procedures.

Infused with special admixtures, **UltraTech Rapid** can be customized to deliver workable strength in as less as 6 hours. It enables you to complete difficult repair jobs overnight with great confidence and excellence. Delivering durable repair overnight is now possible with **UltraTech Rapid**.

**Why settle for the ordinary,
when you can build the extraordinary!**
